Fully glazed overhead sectional door for maximum visibility

The Crawford 242FG overhead sectional doors are fully glazed door, designed to be used when there is a need for maximum light, exposure, or vision.

Up to 3300 mm each aluminium frame is glazed with one single pane of single or double hardened glass. Larger doors up to 5500 mm only use two panes of hardened glass. This ensures a maximum of light and view, inside out and vice versa.

Especially showrooms, where maximum visibility is important, benefit from this design feature. The sleek design of the Crawford 242FG panels gives a high class presentation next to this high light admission. All in all a state of the art design that fits perfectly in modern buildings and showrooms.

Standard colours

The inside and outside standard colour of the Crawford 242FG overhead sectional door is anodised aluminium. Next to this there is factory painting in all RAL colours available.
